

THE MINNEAPOLIS SUNDAY TRIBUNE, APRIL 30 1911

Red Lake Falls, Minn., in Heart of Great Agricultural Region

Red Lake County—Facts About Its Surface, Soil, Climate and Industries

Sixteen Creameries and Cheese Factories and Twenty Schools Among the Things Which Make Living There Worth While.

The sixteen townships comprising Red Lake county have various creameries and cheese factories, several schools, ten railroad shipping points, stations of every denomination, excellent roads, R. F. D. and rural telephone lines to all parts of the county.

THE SURFACE is an undulating prairie with a general slope in a South-westerly direction of some three eighths of a mile. Along the numerous streams and rivers are found groves of poplar, elm and oak timber.

THE SOIL is a deep, rich, black loam underlain with clay and produces the best of corn, potatoes, fruits, vegetables, small grains and timothy and clover.

THE CLIMATE is delightful in summer and never disagreeable in winter. Our winters are steady and not subject to the sudden changes of northern Minnesota or Iowa.

For sheep, corn, oats or clover, come to Red Lake county.

LANDS—Agricultural Possibilities.

MORE than ninety-eight per cent of the land in Red Lake county is available for agricultural purposes. The land has splendid natural drainage with a general fall of over seven feet to the mile. The soil is composed of a slightly sandy loam on a clay subsoil. In color the soil ranges from a dark gray to a deep black. It has plenty of depth, is very rich, quick and exceedingly productive.

The county is dotted with numerous groves, some quarter-sections are clear prairie, some all timber, some about half and half, and others largely prairie with small groves of native timber. There is enough of poplar and hard woods to last for generations for domestic purposes.

There are no pine, tamarack or cut-over lands in the county. Red Lake county is about 40 miles from the nearest pine timber. Prices of lands range from \$25 to \$70 per acre, and can be bought on very reasonable terms.

Red Lake county land can and does produce as good clover as any land in Iowa or Illinois, can and does produce as good corn as Southern Minnesota did 15 years ago and it's getting better every season. On potatoes and dairy products it does not take a back seat for any section. On strawberries and other small fruits it is coming to the front rapidly. Apples and grapes are also grown.

Red Lake Falls and Red Lake county will welcome you.—COME.

that was good considering the dry season. Calves lost one set of potatoes gave me 125 bushels and from my own I made over 6500 in less than seven months. All of the returns would have been far better had it not been that last year was the droust year in the history of the county.

C. O. KANDEL—Of the Terrellsboro Mining Co. As regards wheat raising and yields, last year was the lightest crop year I have seen here in my seventeen years of experience as a farmer and I think that it will not be long before you will see a few yields though I can give you a few yields though

REGIS GAGNON—On S. E. 1/4 of 150-41 says: In 1910 I raised 2,000 bu. wheat, 2,000 bu. oats, 200 bu. flax, 300 bu. potatoes, 100 bu. barley, 30 bu. clover, 10 bu. timothy seed.

JOHN H. GLASS—On S. W. 1/4 of 150-41 says: I came to Red Lake Co. from Iowa nine years ago. I have grown both corn here every year and have produced an average of 40 bu. of well cultivated corn per acre each year. I have also grown large quantities of wheat. Red Lake county is a winner.

C. J. MCGRATH—On Sec. 7, 150-41, says: I came here from Iowa in the late '80s. We talk about potatoes!

Red Lake Falls, One of the Most Beautiful Cities in Upper Minnesota

County Seat of Red Lake County and Endowed by Nature to Be One of the Prettiest Cities in the Great Bread and Butter State.

Red Lake Falls, the county seat of Red Lake county, is a city of two thousand people. Nature has made it the most beautiful city in Northern Minnesota, located as it is at the junction of the Red Lake and Clearwater rivers. Lively homes, nestled in groves of natural timber, overlooking the waters seventy feet below, and others are located on lower levels along the river banks.

H. M. Blythe and company of Chicago have bought up and will develop all upon the wonderful water power in this city and will offer thousands of horse power at very low rates for factories wishing to locate here. Red Lake Falls will soon be noted as the City of Waterpower.

The city has an excellent school system consisting of graded schools, high school and the St. Joseph's parochial school. Red Lake Falls has churches of every denomination, three banks, three hotels and a number of mercantile establishments, all of which are prosperous. It already has the Great Northern and Northern Pacific railroads and the Soo Line will build a line to help take care of the factories. Residents are glad to welcome any desiring a home in Red Lake Falls.

I never saw the equal of Red Lake county potatoes. I raised over 25 bu. of burdock per acre. Red Lake Co. is good enough for me.

ELDDOR BABEL—On N. E. 1/4 of 151-44 says: In 1908 I had a field of 100 acres of medium red clover that produced an average of over 3 1/2 tons per acre the 2nd cutting.

JOSEPH DUPONT—On N. E. 1/4 of 150-41, in an 180-acre tract. From January 1 to December 31, 1909, I had and milked ten cows and no more, and from those ten cows, besides having all the butter and milk I needed for my family, I sold \$652.85 worth of cream and milk.

Statement of Eustachius Omandy, located 14 miles east of Red Lake Falls:

Dear Sir:

Years of January 25th at hand and I herewith send you a statement of this creamery for 1909.

Cream received	454,614 lbs.
Average test	34 1/2%

What the Farmers Say About Red Lake County.

No One Can Speak Better Than the Man Who Is Successful.

Red Lake Falls, Minn., Nov. 2, 1910.

Dear Sir:

For the last four or five years I have been looking the country over for a location for two large stock farms, and finally decided that Red Lake county on account of its fine timber growth, and the ability to raise corn and all kinds of small grains, was all right for what I wanted.

Two years ago we purchased two fine farms, eight miles northwest of Red Lake Falls and one-half mile from the city. The first yield of grain and phases this year 1910, has shown this wisdom was represented, once again we are getting into thick and during, as I considered this county one of the very best dairy, stock and grain counties in the state.

W. H. PHINNEY, (Signed)

Red Lake County Buile This Farmer:

Dear Sir:

That 1, 1910, is answer to your inquiry as to whether farming in Red Lake county, will pay that I came to Red Lake county five years ago. After looking over several localities, I decided to be-

FRANK LA PLANTE—On Sec. 31, 151-41. Last year I raised 1,500 bushels of wheat on 42 acres, 650

W. J. MONTRELL—On Sec. 6, 150-41. I raised 1,112 bushels of wheat, 1,214 bushels of oats, 300 bushels of barley, 100 bushels of buckwheat last year, and in five months we made over \$250 from seven cows. Clover, timothy and such does very fine here. I will \$40.00 per acre for my land.

FRANK LA PLANTE—On Sec. 31, 151-41. Last year I raised 1,500 bushels of wheat on 42 acres, 650
